PROJECTS

Dog Breed Classifier. Developed a **MobileNetV2 model** using TensorFlow/Keras to classify 120 dog breeds from 10,000 images with high accuracy.

Bulldozer Price Prediction. Built a **RandomForestRegressor model** achieving an RMSLE of 0.244 to predict bulldozer prices from time-series data.

Heart Disease Predictor. Created a **binary classification model** with logistic regression and random forest, achieving ~88% accuracy, along with creating a multilevel risk classifier using feature engineering and analyzing feature importance with **SHAP** values.
